Dr. Mohan K. Kale
Principal,
K.G.R.D.C.P. & R.I.,
KARJAT.

From Principal Desk....

Traditional teaching has been around for thousands of years. We don't recommend shutting down schools and colleges and conducting only online courses. The traditional method has its own benefits like face-to-face interaction and developing interpersonal skills and group learning, which are essential skills for the overall development of a student. But, it can't be denied that technology, if used wisely, can play a powerful role in teaching. So, instead of replacing formal education with online education, they can be merged together to create more effective efficient and interactive teaching learning experience.

Dr. Vaishali Y. Jadhav
HOD
(D.PHARMACY)
K.G.R.D.C.P.&R.I., KARJAT.

From HOD Desk.....

In the recent years online learning has gained huge popularity as visual learning helps in easy understanding and memorization. But on the other side the traditional learning has its own benefits which cannot be compared or obtained from any other learning techniques. So I would always recommend to merge various learning techniques like online, traditional, experiential and various innovative methods resulting in complete effective and interactive learning.

Previously signed MOU

The college has already signed 12 MOU with several industries, hospitals and pathology laboratories

Currently signed MOU

KGRDCP & RI signed 2 MOU with Gansons private limited on 11th December 2019 and with Galaxy Pharma Ltd on 3rd December 2019 respectively

Student Speak...

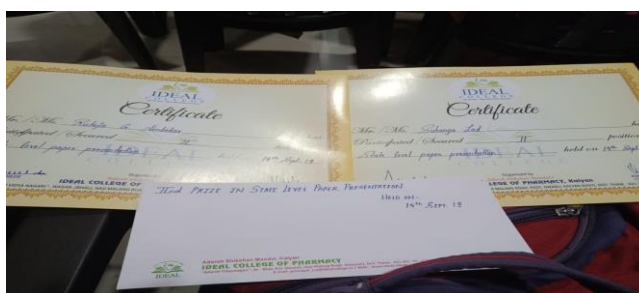

"Online teaching and learning has tremendous benefits but face to face interaction with the teacher is equally important which provides more understanding and guidance."

-Pravinkumar Choudhary (F.Y.Dpharm)
